NFC Book II Locality Structure L4 Shell

Schema v0.38.0

L4 Spine Release Candidate

First spine book with a conditional layer

Generated by NFC Governance Engine v38

Contents

Two-layer structure. Book II has an unconditional [U] layer and a conditional [C] layer gated by the LS-2 locality hypothesis. LS-2 is the principal conditional hinge of the NFC corpus. This is an L4 spine-pilot shell — the canonical Book II is the authoritative source.

Book II Locality Structure — L4 Generated Shell

Book II has a two-layer structure: an unconditional [U] layer and a conditional [C] layer gated by the LS-2 locality hypothesis. LS-2 is the principal conditional hinge of the NFC corpus. For canonical $K_0 = 7$ Phase-A substrates, LS-2 holds universally (`cor:II.ls2-universal-K07` [U]).

[U] Layer — Unconditional Results

Machine ID	St.	Canonical label
`sr:II.no-local-smuggling`	**[D]**	No-Local-Smuggling Rule (`sr:no-local-smuggling`)
`thm:II.DW-from-A2`	**[U]**	DW from Structural Invariance (A2) (`thm:DW-from-A2`)
`thm:II.TC-from-sr`	**[U]**	TC from Toggle-Complete Standing Rule (`thm:TC-from-sr`)
`thm:II.covering-bound-K07`	**[U]**	Covering Bound for K_0=7 (`thm:covering-bound-K07`)
`cor:II.ls2-universal-K07`	**[U]**	LS-2 Universal for K_0=7 Phase-A (`cor:ls2-universal-K07`)
`thm:II.PASS`	**[U]**	PASS as Derived Necessity (`thm:PASS`)
`thm:II.binary-rigidity`	**[U]**	Binary Rigidity Theorem (`thm:binary-rigidity`)
`thm:II.local-nuclear`	**[U]**	Local Nuclear Theorem (`thm:local-nuclear`)

[C] Layer — Conditional on LS-2 and/or Phase-A

Machine ID	St.	Canonical label
`hyp:II.LS2`	**[C]**	LS-2 Hypothesis [C] — principal hinge (`hyp:LS2`)
`thm:II.ls2-from-conditions`	**[C]**	LS-2 from DW+TC+LAR (rho*=2) (`thm:ls2-from-conditions`)

Machine ID	St.	Canonical label
`thm:II.boundary-det`	**[C]**	Boundary Determinacy (`thm:boundary-det`)
`thm:II.boundary-capacity`	**[C]**	Boundary Capacity Counting Bound (`thm:boundary-capacity`)
`thm:II.SCT1`	**[C]**	SCT.1 Coercive Transport Stage 1 (`thm:SCT1`)
`thm:II.SCT6b`	**[C]**	SCT.6b Safe Tail Discharge (`thm:SCT6b`)
`thm:II.governing`	**[C]**	Boundary Stabilization Theorem (`thm:governing (II)`)

Full Claim Catalog

Machine ID	Kind	St.	Title
`sr:II.no-local-smuggling`	standing_r	**[D]**	No-Local-Smuggling Rule
`def:II.collar`	definition	**[D]**	Collar and Collar Type
`def:II.DW`	definition	**[D]**	Dominated-Witness Condition (DW)
`def:II.TC`	definition	**[D]**	Toggle-Complete Condition (TC)
`def:II.LAR`	definition	**[D]**	Local Admissible Realizability Condition (LAR)
`def:II.structural-phases`	definition	**[D]**	Structural Phases (Phase-A, Phase-B, Phase-C)
`thm:II.DW-from-A2`	theorem	**[U]**	DW from Structural Invariance (A2)
`thm:II.TC-from-sr`	theorem	**[U]**	TC from Toggle-Complete Standing Rule
`thm:II.covering-bound-K07`	theorem	**[U]**	Covering Bound for K_0=7 (Phase-A Demand)
`cor:II.ls2-universal-K07`	corollary	**[U]**	LS-2 Universal for K_0=7 Phase-A Substrates
`thm:II.PASS`	theorem	**[U]**	PASS as Derived Necessity
`thm:II.binary-rigidity`	theorem	**[U]**	Binary Rigidity Theorem
`thm:II.local-nuclear`	theorem	**[U]**	Local Nuclear Theorem
`hyp:II.LS2`	obligation	**[C]**	LS-2 Locality Hypothesis
`thm:II.ls2-from-conditions`	theorem	**[C]**	Stabilized Collar Determinacy Theorem (LS-2 from D
`thm:II.boundary-det`	theorem	**[C]**	Boundary Determinacy Theorem
`thm:II.boundary-capacity`	theorem	**[C]**	Boundary Capacity Counting Bound
`thm:II.SCT1`	theorem	**[C]**	Shared Coercive Transport Stage 1 (SCT.1)
`thm:II.SCT6b`	theorem	**[C]**	Shared Coercive Transport Stage 6b (SCT.6b)
`thm:II.governing`	theorem	**[C]**	Boundary Stabilization Theorem (Book II Governing)
`status:II`	remark	**[R]**	Book II Status — [U] layer and [C] layer
