Contents

Book I L4 Shell

1

Book I is the unconditional source architecture. All theorem-like objects are [U]. This is an L4 spine-pilot shell — the canonical Book I is the authoritative source.

Book I Unconditional Foundation — L4 Generated Shell

Book I establishes the unconditional source architecture of NFC: observational quotienting, finite stabilization, defect ledger, and the $K_0 = 7$ collar alphabet uniqueness. All results are [U]. The canonical Book I remains the authoritative source.

Primary Unconditional Exports

Machine ID	Status	Canonical label / cross-check
thm:I.governing	[U]	Observational Quotient Theorem (thm:governing)
thm:I.stabilization	[U]	Finite Stabilization Theorem (thm:stabilization)
thm:I.K0-prime	[U]	$K_0 = 7$ Uniqueness (thm:K0-prime)
cor:I.no-presentation-surplus	[U]	No-Presentation-Surplus Rule (cor:no-pres-surplus)
prop:I.defect-nonneg	[U]	Defect Non-Negativity (prop:defect-nonneg)
prop:I.ledger-additivity	[U]	Defect Additivity (prop:ledger-add)
cor:I.defect-welldef	[U]	Defect Well-Definedness (cor:defect-welldef)
thm:I.entropy-monotone	[U]	Entropy Monotonicity (thm:entropy-monotone)
thm:I.ledger-entropy-duality	[U]	Ledger-Entropy Duality (thm:ledger-ent-dual)

Full Claim Catalog

Machine ID	Kind	St.	Title
sr:I.no-primitive	standing_r	[D]	No-Primitive Rule
sr:I.no-smuggling	standing_r	[D]	No-Smuggling Rule
sr:I.cg-alphabet	standing_r	[D]	Collar-Geometry Alphabet Standing Rule
def:I.admissible-class	definition	[D]	Admissible Class (A1–A4)
def:I.obs-equiv	definition	[D]	Observational Equivalence

Machine ID	Kind	St.	Title
def:I.obs-quotient	definition	[D]	Observational Quotient
def:I.stabilization	definition	[D]	Stabilization and Stabilized Quotient
def:I.defect-ledger	definition	[D]	Defect Ledger
lem:I.obs-equiv-equiv	theorem	[U]	Observational Equivalence is an Equivalence Relati
lem:I.behavioral-canonical	theorem	[U]	Behavioral Congruence Canonicity
prop:I.defect-nonneg	propositio	[U]	Defect Ledger Non-Negativity
prop:I.ledger-additivity	propositio	[U]	Defect Ledger Additivity
thm:I.emax-unique	theorem	[U]	Admissible-Class Canonicity Theorem
thm:I.KO-prime	theorem	[U]	Primality and Uniqueness of the Collar Alphabet (K
thm:I.stabilization	theorem	[U]	Finite Stabilization Theorem
thm:I.entropy-monotone	theorem	[U]	Structural Entropy Monotonicity Theo- rem
thm:I.ledger-entropy-duality	theorem	[U]	Ledger–Entropy Duality Theorem
thm:I.governing	theorem	[U]	Observational Quotient Theorem (Book I Governing)
cor:I.no-presentation-surplus	corollary	[U]	No-Presentation-Surplus Rule
cor:I.defect-welldef	corollary	[U]	Defect Ledger Well-Definedness
cor:I.holographic-sparsity	corollary	[U]	Holographic Sparsity Corollary
status:I	remark	[R]	Book I Status — all results unconditional

Book I Boundary (Non-Claims)

Book I proves the items above and nothing more. The following belong to later books and may not be imported from Book I:

- Local stability of observable outcomes — belongs to Books II/III
- Boundary determinacy — belongs to Books II/IV
- Source universality — belongs to Book III
- Branch legitimacy — belongs to Book V
- Continuum correspondence — belongs to Book VI
