

NFC YM Branch Successor Pilot

Generated governance shell

Contents

YM Branch Successor Pilot

1

YM Branch Successor Pilot

This generated packet is an L2 branch-pilot shell. It is not a supersession of the canonical YM Branch Book. It tests whether structured claim records and human-authored prose fragments can regenerate a governance-faithful YM packet.

Pilot posture

Computed YM posture: **conditional-cert-close**. The surviving residual frontier is **ob:YM.B3.A2**.

Table 1: YM successor-pilot claim catalog

ID	Kind	Declared	Computed	Scope
ob:YM.O-ID	obligation	C	C	branch-local
thm:YM.ID	theorem	C	C	branch-local
ob:YM.O-RIG	obligation	C	C	branch-local
thm:YM.RIG	theorem	C	C	branch-local
ob:YM.O-ENC	obligation	C	C	branch-local
thm:YM.ENC	theorem	C	C	branch-local
ob:YM.O-GLOB	obligation	C	C	branch-local
thm:YM.GLOB	theorem	C	C	branch-local
ob:YM.O-CLU	obligation	C	C	branch-local
thm:YM.CLU	theorem	C	C	branch-local
thm:YM.7	theorem	C	C	branch-wide
ob:YM.B1	obligation	C	C	branch-local
thm:YM.B1.bridge	theorem	C	C	branch-local
ob:YM.B2	obligation	C	C	branch-local
thm:YM.B2.bridge	theorem	C	C	branch-local
ob:YM.B3	obligation	C	C	branch-local

Generated claim shells

Obligation: Operator / Target-Side Identification Obligation

Machine ID. ob:YM.O-ID

Declared status. C **Computed status.** C

Scope. regime=ym-bridge-stack; domain=YM-branch; certificate_scope=branch-local; continuum_license=book-VI-certified; promotion_ceiling=C; constraints=source-identification

Operator / Target-Side Identification Obligation Placeholder canon-migration text for ‘ob:YM.O-ID’.

This file intentionally preserves human-authored prose as the canonical text layer while governance metadata is validated separately.

Theorem-like claim: YM Identification Discharge Packet

Machine ID. thm:YM.ID

Declared status. C **Computed status.** C

Scope. regime=ym-bridge-stack; domain=YM-branch; certificate_scope=branch-local; continuum_license=book-VI-certified; promotion_ceiling=C; constraints=source-identification,msc-normalized

YM Identification Discharge Packet Placeholder canon-migration text for ‘thm:YM.ID’.

This file intentionally preserves human-authored prose as the canonical text layer while governance metadata is validated separately.

Dependencies. thm:VII.6.4

Discharge edges. ob:YM.O-ID

Proof stub.

YM Identification Discharge Packet Placeholder canon-migration text for ‘thm:YM.ID’.

This file intentionally preserves human-authored prose as the canonical text layer while governance metadata is validated separately.

Obligation: Operator Rigidity Obligation

Machine ID. ob:YM.O-RIG

Declared status. C **Computed status.** C

Scope. regime=ym-bridge-stack; domain=YM-branch; certificate_scope=branch-local; continuum_license=book-VI-certified; promotion_ceiling=C; constraints=operator-rigidity

Operator Rigidity Obligation Placeholder canon-migration text for ‘ob:YM.O-RIG’.

This file intentionally preserves human-authored prose as the canonical text layer while governance metadata is validated separately.

Theorem-like claim: YM Rigidity Discharge Packet

Machine ID. thm:YM.RIG

Declared status. C **Computed status.** C

Scope. regime=ym-bridge-stack; domain=YM-branch; certificate_scope=branch-local; continuum_license=book-VI-certified; promotion_ceiling=C; constraints=operator-rigidity,msc-normalized

YM Rigidity Discharge Packet Placeholder canon-migration text for ‘thm:YM.RIG‘.

This file intentionally preserves human-authored prose as the canonical text layer while governance metadata is validated separately.

Dependencies. thm:VII.6.4, thm:YM.ID

Discharge edges. ob:YM.O-RIG

Proof stub.

YM Rigidity Discharge Packet Placeholder canon-migration text for ‘thm:YM.RIG‘.

This file intentionally preserves human-authored prose as the canonical text layer while governance metadata is validated separately.

Obligation: Encoding Compatibility Obligation

Machine ID. ob:YM.O-ENC

Declared status. C **Computed status.** C

Scope. regime=ym-bridge-stack; domain=YM-branch; certificate_scope=branch-local; continuum_license=book-VI-certified; promotion_ceiling=C; constraints=encoding-compatibility

Encoding Compatibility Obligation Placeholder canon-migration text for ‘ob:YM.O-ENC‘.

This file intentionally preserves human-authored prose as the canonical text layer while governance metadata is validated separately.

Theorem-like claim: YM Encoding Compatibility Packet

Machine ID. thm:YM.ENC

Declared status. C **Computed status.** C

Scope. regime=ym-bridge-stack; domain=YM-branch; certificate_scope=branch-local; continuum_license=book-VI-certified; promotion_ceiling=C; constraints=encoding-compatibility,msc-normalized

YM Encoding Compatibility Packet Placeholder canon-migration text for ‘thm:YM.ENC‘.

This file intentionally preserves human-authored prose as the canonical text layer while governance metadata is validated separately.

Dependencies. thm:VII.6.4, thm:YM.RIG

Discharge edges. ob:YM.O-ENC

Proof stub.

YM Encoding Compatibility Packet Placeholder canon-migration text for ‘thm:YM.ENC‘.

This file intentionally preserves human-authored prose as the canonical text layer while governance metadata is validated separately.

Obligation: Global Coercivity Obligation

Machine ID. ob:YM.O-GLOB

Declared status. C **Computed status.** C

Scope. regime=ym-bridge-stack; domain=YM-branch; certificate_scope=branch-local; continuum_license=book-VI-certified; promotion_ceiling=C; constraints=global-coercivity

Global Coercivity Obligation Placeholder canon-migration text for ‘ob:YM.O-GLOB’.

This file intentionally preserves human-authored prose as the canonical text layer while governance metadata is validated separately.

Theorem-like claim: YM Global Coercivity Packet

Machine ID. thm:YM.GLOB

Declared status. C **Computed status.** C

Scope. regime=ym-bridge-stack; domain=YM-branch; certificate_scope=branch-local; continuum_license=book-VI-certified; promotion_ceiling=C; constraints=global-coercivity,msc-normalized

YM Global Coercivity Packet Placeholder canon-migration text for ‘thm:YM.GLOB’.

This file intentionally preserves human-authored prose as the canonical text layer while governance metadata is validated separately.

Dependencies. thm:VII.6.4, thm:YM.ENC

Discharge edges. ob:YM.O-GLOB

Proof stub.

YM Global Coercivity Packet Placeholder canon-migration text for ‘thm:YM.GLOB’.

This file intentionally preserves human-authored prose as the canonical text layer while governance metadata is validated separately.

Obligation: Cluster / Vacuum Uniqueness Obligation

Machine ID. ob:YM.O-CLU

Declared status. C **Computed status.** C

Scope. regime=ym-bridge-stack; domain=YM-branch; certificate_scope=branch-local; continuum_license=book-VI-certified; promotion_ceiling=C; constraints=cluster-vacuum

Cluster / Vacuum Uniqueness Obligation Placeholder canon-migration text for ‘ob:YM.O-CLU’.

This file intentionally preserves human-authored prose as the canonical text layer while governance metadata is validated separately.

Theorem-like claim: YM Cluster and Vacuum Packet

Machine ID. thm:YM.CLU

Declared status. C **Computed status.** C

Scope. regime=ym-bridge-stack; domain=YM-branch; certificate_scope=branch-local; continuum_license=book-VI-certified; promotion_ceiling=C; constraints=cluster-vacuum,msc-normalized

YM Cluster and Vacuum Packet Placeholder canon-migration text for ‘thm:YM.CLU’.

This file intentionally preserves human-authored prose as the canonical text layer while governance metadata is validated separately.

Dependencies. thm:VII.6.4, thm:YM.GLOB

Discharge edges. ob:YM.O-CLU

Proof stub.

YM Cluster and Vacuum Packet Placeholder canon-migration text for ‘thm:YM.CLU’.

This file intentionally preserves human-authored prose as the canonical text layer while governance metadata is validated separately.

Theorem-like claim: Endpoint Mass-Gap and OS/Wightman Closure Packet

Machine ID. thm:YM.7

Declared status. C **Computed status.** C

Scope. regime=ym-msc-normalized; domain=YM-branch; certificate_scope=branch-wide; continuum_license=book-VI-certified; promotion_ceiling=C; constraints=msc-normalized,persistence-selected,conditional-bridge-stack

Within the MSC-normalized, persistence-selected regime, the YM endpoint packet delivers positive gap, clustering, vacuum uniqueness, and OS/Wightman structural closure conditionally.

Dependencies. thm:YM.ID, thm:YM.RIG, thm:YM.ENC, thm:YM.GLOB, thm:YM.CLU, thm:VI.9.1, thm:VII.6.4

Proof stub. Proof sketch placeholder.

Obligation: B1 Quantization Bridge Residual

Machine ID. ob:YM.B1

Declared status. C **Computed status.** C

Scope. regime=ym-postprogram; domain=YM-branch; certificate_scope=branch-local; continuum_license=book-VI-certified; promotion_ceiling=C; constraints=quantization-bridge

B1 Quantization Bridge Residual Placeholder canon-migration text for ‘ob:YM.B1’.

This file intentionally preserves human-authored prose as the canonical text layer while governance metadata is validated separately.

Theorem-like claim: B1 Quantization Bridge Conditional Packet

Machine ID. thm:YM.B1.bridge

Declared status. C **Computed status.** C

Scope. regime=ym-postprogram; domain=YM-branch; certificate_scope=branch-local; continuum_license=book-VI-certified; promotion_ceiling=C; constraints=quantization-bridge,conditional-postprogram

B1 Quantization Bridge Conditional Packet Placeholder canon-migration text for ‘thm:YM.B1.bridge’.

This file intentionally preserves human-authored prose as the canonical text layer while governance metadata is validated separately.

Dependencies. thm:YM.7

Discharge edges. ob:YM.B1

Proof stub.

B1 Quantization Bridge Conditional Packet Placeholder canon-migration text for ‘thm:YM.B1.bridge’.

This file intentionally preserves human-authored prose as the canonical text layer while governance metadata is validated separately.

Obligation: B2 Domain Bridge Residual

Machine ID. ob:YM.B2

Declared status. C **Computed status.** C

Scope. regime=ym-postprogram; domain=YM-branch; certificate_scope=branch-local; continuum_license=book-VI-certified; promotion_ceiling=C; constraints=domain-bridge

B2 Domain Bridge Residual Placeholder canon-migration text for ‘ob:YM.B2’.

This file intentionally preserves human-authored prose as the canonical text layer while governance metadata is validated separately.

Theorem-like claim: B2 Domain Bridge Conditional Packet

Machine ID. thm:YM.B2.bridge

Declared status. C **Computed status.** C

Scope. regime=ym-postprogram; domain=YM-branch; certificate_scope=branch-local; continuum_license=book-VI-certified; promotion_ceiling=C; constraints=domain-bridge,conditional-postprogram

B2 Domain Bridge Conditional Packet Placeholder canon-migration text for ‘thm:YM.B2.bridge’.

This file intentionally preserves human-authored prose as the canonical text layer while governance metadata is validated separately.

Dependencies. thm:YM.7

Discharge edges. ob:YM.B2

Proof stub.

B2 Domain Bridge Conditional Packet Placeholder canon-migration text for ‘thm:YM.B2.bridge’.

This file intentionally preserves human-authored prose as the canonical text layer while governance metadata is validated separately.

Obligation: B3 Compact Simple SU(3) Bridge Residual

Machine ID. ob:YM.B3

Declared status. C **Computed status.** C

Scope. regime=ym-postprogram; domain=YM-branch; certificate_scope=branch-local; continuum_license=book-VI-certified; promotion_ceiling=C; constraints=compact-simple-su3-bridge

B3 Compact Simple SU(3) Bridge Residual Placeholder canon-migration text for ‘ob:YM.B3’.

This file intentionally preserves human-authored prose as the canonical text layer while governance metadata is validated separately.

Theorem-like claim: B3 Compact Simple SU(3) Conditional Packet

Machine ID. thm:YM.B3.bridge

Declared status. C **Computed status.** C

Scope. regime=ym-postprogram; domain=YM-branch; certificate_scope=branch-local; continuum_license=book-VI-certified; promotion_ceiling=C; constraints=compact-simple-su3-bridge,conditional-postprogram

B3 Compact Simple SU(3) Conditional Packet Placeholder canon-migration text for ‘thm:YM.B3.bridge’.

This file intentionally preserves human-authored prose as the canonical text layer while governance metadata is validated separately.

Dependencies. thm:YM.7, ob:YM.B3.A2

Discharge edges. ob:YM.B3

Proof stub.

B3 Compact Simple SU(3) Conditional Packet Placeholder canon-migration text for ‘thm:YM.B3.bridge’.

This file intentionally preserves human-authored prose as the canonical text layer while governance metadata is validated separately.

Obligation: Simple A2 Gap Restriction Without SM Gauge Dependence

Machine ID. ob:YM.B3.A2

Declared status. O **Computed status.** O

Scope. regime=ym-postprogram; domain=YM-branch; certificate_scope=branch-local; continuum_license=book-VI-certified; promotion_ceiling=C; constraints=standalone-a2-gap,simple-a2-gap-without-sm-gauge-algebra-dependence

Remaining A2 reserve/gap restriction burden outside the current unconditional toolkit.

Status note: YM Branch Posture Record

Machine ID. status:YM

Declared status. conditional-cert-close **Computed status.** conditional-cert-close

Scope. regime=ym-branch-governance; domain=YM-branch; certificate_scope=branch-wide; continuum_license=book-VI-certified; promotion_ceiling=conditional-cert-close; constraints=msc-normalized,persistence-selected,clay-grade-postprogram-gaps,B3-A2-residual-frontier

Older local posture language still says CERT-PROJ even though later packets support a stronger conditional close posture.

Dependencies. thm:VII.6.4, thm:YM.7, thm:YM.B1.bridge, thm:YM.B2.bridge, thm:YM.B3.bridge, ob:YM.B3.A2
