Contents

Book VII L4 Shell

1

L4 governance notice. Book VII is the governance book. Its theorems establish the rules governing all other books. All Book VII theorems are [U]: conditional governance rules would be self-undermining. This is a machine-generated L4 spine-pilot shell. The canonical Book VII remains the authoritative source.

Book VII Governance Spine — L4 Generated Shell

This generated shell maps the Book VII governance framework into the NFC governance engine's machine-readable format. The Book VII canonical book remains the authoritative source. All Book VII theorem-like objects are [U] or [D] — conditional governance rules would be self-undermining.

Governance Framework Summary

Machine ID	Kind	St.	Title / Note
sr:VII.declare-status	standing	[D]	Declare Status Standing Rule <i>Every theorem must declare status, dependenci</i>
sr:VII.no-inflation	standing	[D]	No-Inflation Standing Rule <i>Status inflation is prohibited; no claim may</i>
sr:VII.no-precanonical	standing	[D]	Pre-Canonical Force Standing Rule <i>Pre-canonical derivations have no canonical f</i>
def:VII.open-obligation	definiti	[D]	Open Obligation <i>Named burden not yet discharged; mathematical</i>
def:VII.discharge-modes	definiti	[D]	Discharge Mode Taxonomy <i>ADDED in Session L+6 from governance synthesi</i>
def:VII.declared-effective-audit	definiti	[D]	Declared, Effective, and Audit Status Tri- chotomy <i>ADDED in Session L+6; stale label = declared</i>
prop:VII.cite-declared-force	proposit	[U]	Cite-Declared-Force Proposition <i>A theorem may be cited only with the force li</i>
prop:VII.stale-label-correction	proposit	[U]	Stale-Label Correction Proposition <i>ADDED in Session L+6; stale labels must be co</i>

Machine ID	Kind	St.	Title / Note
thm:VII.2.4	theorem	[U]	Scoped Certificate Rule <i>A scoped certificate cannot be cited at wider</i>
thm:VII.2.5	theorem	[U]	Promotion Requires Transfer Theorem <i>Conditional-to-unconditional promotion requir</i>
prop:VII.downstream-force	proposit	[U]	Downstream Force Proposition <i>Downstream claim carries only the force of it</i>
thm:VII.4.3	theorem	[U]	Named Failure Frontier Theorem <i>Rephrasing is not progress; named frontier re</i>
prop:VII.no-hidden-upgrade	proposit	[U]	No-Hidden-Upgrade Rule <i>Endpoint label must pass four tests: eliminab</i>
thm:VII.6.4	theorem	[U]	Canonical Closure Schema Theorem <i>Every branch book must declare five items; ma</i>
thm:VII.non-retroactive	theorem	[U]	Non-Retroactivity of Branch Certification <i>No newly admitted branch may retroactively al</i>
prop:VII.shared-endgame	proposit	[U]	Shared Endgame Schema <i>Three-part structure: source-controlled reali</i>
thm:VII.governing	theorem	[U]	Governing Theorem of Book VII <i>Combines status discipline + promotion law +</i>
rmk:VII.posture-vs-force	remark	[R]	Branch Posture vs. Claim-Force Vocabulary <i>ADDED Session L+6; [U]/[C]/[O] are per-claim;</i>
status:VII	status_n	[U]	Book VII Branch Status <i>Book VII has no open obligations; all results</i>

Governance Rule to Canonical Theorem Mapping

The following table maps each `governance_rules.yaml` check to its canonical source in Book VII:

Governance Rule	Machine ID	Canonical Theorem
rule.claim.must-have-core-fields	sr:VII.declare-status	sr:declare-status
rule.dependencies.must-resolve	prop:VII.cite-declared-force	prop:cite-declared-force
rule.no-hidden-promotion	thm:VII.2.5	thm:promotion-requires-transfer
rule.scope-widening-requires-transf	thm:VII.2.4	thm:scoped-cert-rule
rule.frontier-stability	thm:VII.4.3	thm:frontier-stability
rule.no-retired-alias-in-active-rec	sr:VII.declare-status	sr:declare-status
rule.posture-must-match-claim-graph	rmk:VII.posture-vs-force	rmk:posture-vs-force
rule.non-retroactivity	thm:VII.non-retroactive	thm:non-retroactive

Session L+6 Additions

Three definitions and one proposition added to Book VII in Session L+6 (from governance synthesis note). These are now canonical and represented in the machine records:

- `def:VII.discharge-modes`: Discharge Mode Taxonomy (*Added Session L+6*)
- `def:VII.declared-effective-audit`: Declared/Effective/Audit Trichotomy (*Added Session L+6*)
- `prop:VII.stale-label-correction`: Stale-Label Correction (*Added Session L+6*)
- `rmk:VII.posture-vs-force`: Branch Posture vs. Claim-Force (*Added Session L+6*)
